Profile Summary

Developer with hands-on experience building Unity-based 2D, 3D, XR applications, including VR and AR solutions and Apple Vision Pro (visionOS) solutions. Committed to continuous learning and leveraging emerging technologies to deliver innovative solutions. Passionate about creating immersive, interactive experiences and motivated to take on interesting technical and creative challenges.

Key Projects

2D Casual Game

- Developed a 2D casual game using Unity and C#, focusing on smooth gameplay and responsive controls.
- Implemented core gameplay logic, input handling, scoring system and UI (UGUI).

3D Interactive Application

- Developed a 3D interactive application using Unity and C#, focusing on gameplay, navigation, and user experience.
- Implemented movement, physics, collisions, camera control, scene setup, UI, input handling, interactions and added interactive elements for engaging gameplay.

VR Training Simulation

- Developed a VR training simulation using Unity and C#, focusing on realistic interactions and user comfort.
- Implemented interactions, locomotion, teleportation, UI, object handling, environment setup, and used XR Interaction Toolkit, OpenXR, Oculus SDK, Unity UI and Autohands for immersive functionality.

AR Interactive Prototype

- Developed an AR interactive application using Unity and C#, focused on object placement and real-world interactions.
- Implemented object tracking, gestures, plane detection, environment mapping, input handling, and UI, using AR Foundation, ARCore, ARKit, and Unity UI for cross-platform functionality.

Apple Vision Pro

- Developed an interactive demo for Apple Vision Pro using Unity and visionOS, focusing on spatial interactions, hand/gaze tracking, UI panels, and object interactions.
- Built spatial workflows using PolySpatial and Unity, handled scene setup and input, and adapted quickly to visionOS technology to deliver functional prototypes.

Technical Skills

Programming & Scripting

C#, Object-Oriented Programming (OOP), Debugging and Code Optimization

Unity & Game Development

Unity Engine (2D & 3D), Scene Management, Animation, Physics, Unity UI (UGUI), Build & Deployment

XR / AR / VR Technologies

Unity XR Interaction Toolkit, OpenXR, AR Foundation, Oculus SDK, Autohands

Spatial Computing

visionOS (Apple Vision Pro) with Unity

Platforms

Android, Windows, Apple Vision Pro

Professional Experience

Tata Consultancy Services (TCS), Developer (XR & Unity)
07/2023 – Present | Chennai

- Developed Unity-based 2D, 3D, and XR applications using C#, delivering immersive and interactive user experiences.
- Built VR and AR solutions, implementing interaction systems, UI flows, and real-time behaviors.
- Contributed to Apple Vision Pro (visionOS) development with Unity, creating spatial experiences and adapting workflows for visionOS.
- Implemented XR features using XR Interaction Toolkit, OpenXR, and AR Foundation, including object interactions and user input handling.
- Performed debugging, performance optimization, and multi-platform build & deployment across Android, Windows, and Apple Vision Pro.

Educational Qualification

Master of Computer Application,
SASTRA Deemed University

2023 – 2025 | Completed with 8.71 CGPA

Bachelor of Science in Computer Science,
BISHOP HEBER COLLEGE

2020 – 2023 | Completed with 8.13 CGPA
